

Flux SDK 669 release notes

Shipped 2026.08.13

Cases fixed

💡 [46252](#). **Expose QRCode in Flux API**

Implemented. Exposed QRCode class in API. This enables encoding of text into QRCode.

And various below enums and properties are exposed.

Newly exposed enumerations:

EBPhase: CenSwing2

EResult: InvalidBevelModel

EGasTypes: N202 and Custom

EFPhase: GriplnAfterENWln and PullZ3Back

ETrigger: JobSaved and PartlnJobSaved

ECutStatus: CutPathsOutsideMachiningBound, MultipleLTT and MaxChamferAngleExceeded

Newly exposed properties:

Class SheetHandlingSettings: CheckProcessingFrame

Class LaserCAMSettings: TrimPartConcavities

Newly exposed Methods:

Class CutConfig: GetPierceType()

💡 [47665](#). **[11838] Improve error handling for multi pickup**

Implemented. Enum EBCStatus now exposes Enums CellPickup and AxisTurnNumber.

💡 [47926](#). **[BENDCAM-10631] B38 bending aid**

Implemented support for the B3000_1500N_B38 value in the BendAidDef.EKind enum

by exposing it through the API. This enum value represents the bending aid configuration for the TruBend 3000 (1500N) B38 model.

🔧 [48091](#). **Fix: Zelos does not work with multiple LTTs**

Fixed.

The ELaserProcessOptions enum now exposes NanoJoints and DeepEngrave values.

The ECut enum now exposes DotMark, DeepEngrave, and DeepEngraveDescale values.
